Subtotal		/8	Owner's/Hunter's Address:	
SUBTRACT Column 4		/8	Measurers Name:	
FINAL NET SCORE		/8	Telephone #:	
			Comments:	

INSTRUCTIONS:

All measurements must be taken with a flexible steel tape to the nearest one-eighth of an inch. Wherever it is necessary to change direction of measurement, mark a control point and swing tape at this point. To simplify addition, please enter fractional figures in eighths.

Official measurements cannot be taken for at least 60 days after the animal was killed.

A. Greatest Spread - measured in a straight line at right angles to the center line of the skull.

B. Sum of Abnormal Points on Both Antlers - Abnormal points are generally considered to be those non-typical in shape or location.

C. Sum of Normal Points for Each Antler - Normal points are those which project from the outer edge of the antler. To be counted as a point, a projection must be at least one inch long and the length must exceed the breadth of the point's base. The breadth need not be computed from the deepest adjacent dips in the palmation. The length may be measured in any location - at least one inch from the tip - at which point the length exceeds the breadth.

D. Width of Palm - taken in contact with the surface across the under side of the palm, at right angles to the inside edge of the palm, to a dip between points at the greatest width of palm. Measure width of palm from mid-points of edges of palm.

E. Length of Palm including Brow Palm - taken in contact with the surface along the under side of the palm parallel to the inner edge from dips between points at the greatest length of palm. If a deep bay is present in the palm, measure palm length across the open bay if the proper line of measurement crosses the bay.

Minimums:

AT & MF	160
ML	140
C	135
AR	130

Tree stand Ground Stand Still Hunting Stalking Rattling
Drive or push Baiting Tracking Calling

Animals activity leading up to the shot _____
Was the animal seen or heard first _____
Was the animal moving when shot? yes walking running no standing bedded
Number of shots taken? _____ Distance(s) _____
After the shot, the animal fell on the spot died within sight ran away walked off
Where was the animal hit? _____
Time waited before trailing? _____ Distance travelled _____
Please write a brief description of how the hunt happened _____

Fair Chase Affidavit

The term "fair chase" shall not be held to include the taking of animals under the following conditions:

1. Helpless in, or because of deep snow, helpless on ice, helpless in a trap, or while swimming.
2. Confined behind high fences as on game farms etc.
3. In defiance of game laws and regulations
4. By "jacklighting" or "shining" at night.
5. From any motorized vehicle.
6. By the use of any power vehicle for herding or driving any animals, including the use of aircraft for landing alongside of any animal or herd, or to communicate with or direct a hunter on the ground.
7. By the use of an tranquilizers or poisons.
8. Any other method considered by the board as unsportsmanlike.

Any falsification of this affidavit will cause this entry to be rejected, no future entries accepted, and all past entries dropped from the record book.

I, _____ by my signature do declare that my trophy _____ was killed in fair chase which I fully understand as defined above. Signature _____ Date _____

Witness to hunter's signature _____ Date _____

Measurer's signature _____ ID No. _____ Date _____
